EXPERIENCE

Facebook — *GIS | Maps Data Analyst*

Spatial Computing, Project Northstar and Mobius
SEPT 2017 - PRESENT

- Used internal tools to edit and validate quality of 2D-geographic model on OpenStreetMap. Query, inspect and education-timeline GIS data and communicated detailed analysis to support decision making.
- Conducted analysis of machine learning results to improve training materials and feedback to engineers to improve tooling.
- Responsible for testing internal UI tools in terms of functionality and provided results of GIS web/AI applications to Project Manager.
- Developed stable processes for human validation related to OpenStreetMap data production and MapQA. Identify gaps in implementation and how it relates to MapQA requirements, test applications and track recommendations.

Codify Academy — *Teacher Aide | Student Mentor*

JUN 2017 - SEPT 2017

- Freelance projects, developed user-friendly sites, social media links/widgets, and organize site content.
- Student mentorship with emphasis on bug fixes, code reviews and responsive web design.

Wells Fargo — *System Application Specialist*

Technology & Operations
JAN 2016 - FEB 2017

- Apply infosec policies, test security controls, educate and react on security policies. Document case statues and provide updates to management and end-users.
- Managed department SharePoint site and various databases related to new software and system installs for contractors and employees.
- Streamlined and improved installation, update processes for shared devices and coordinated virtual support resources for remote offices.

ABOUT ME

- Strong conceptual and analytical thinker.
- Commitment to quality and testing for optimal end-user experience.
- Eager to learn from my peers regardless of industry.

SKILLS

JavaScript	Quality Testing
HTML5	LeafletJS
CSS3	A/B Testing
